

CM-BB10-27-W / CM-S10-27-W (Shipped in 2 boxes)

STEP 1 - Remove Items from boxes and inspect.

Supplied Parts

- A. Top Mount Assembly
- B. Top Tube 1.75" dia x 92" lg.
- C. Extension Assembly
- D. Middle Tube, 1.375" dia. X 94"lg.
- E. Bottom Telescoping Tube 1" dia.
- F. Tether (not shown)
- G. Hardware Kit #1
 - a. Bolt, Hex Head, 3/8-16 x5.5" (2)
 - b. Washer (2)
 - c. Washer, Split lock 3/8 (2)
 - d. Hex nut, 3/8-16 (2)
- H. Hardware Kit #2
 - e. Screw, 1/4-20 x 2.25" Pan Hd. Phil (4)
 - f. Nut, Nylon, 1/4-20 (12)
 - g. Screw, 1/4-28 x .375" Pan Hd. Phil (7)
 - h. Screw, 1/4-20 x 1.75" Pan Hd. Phil (3)
 - i. Screw, 1/4-20 x 2.5" Pan Hd. Phil (1)
- I. Hardware Kit #3
 - j. Screw, Pan Head, 1/4-20 x 1.5" Phillips (2)
 - k. Locknut, 1/4-20 (2)
 - l. Packages of 4 screws M4-0.7 x6mm (2)
- J. Spare Hardware Kit
- K. Back to Back Mount (CM-BB10-27-W only)
- L. Single Monitor Mount (CM-S10-27-W only)

Wedging Screw Package

- (1) used in Tube D
- (1) Spare

Required Tools

1. Wrench/ Socket size 9/16"
2. Wrench/ Socket size 7/16"
3. Screw driver #3

G - Hardware Kit #1

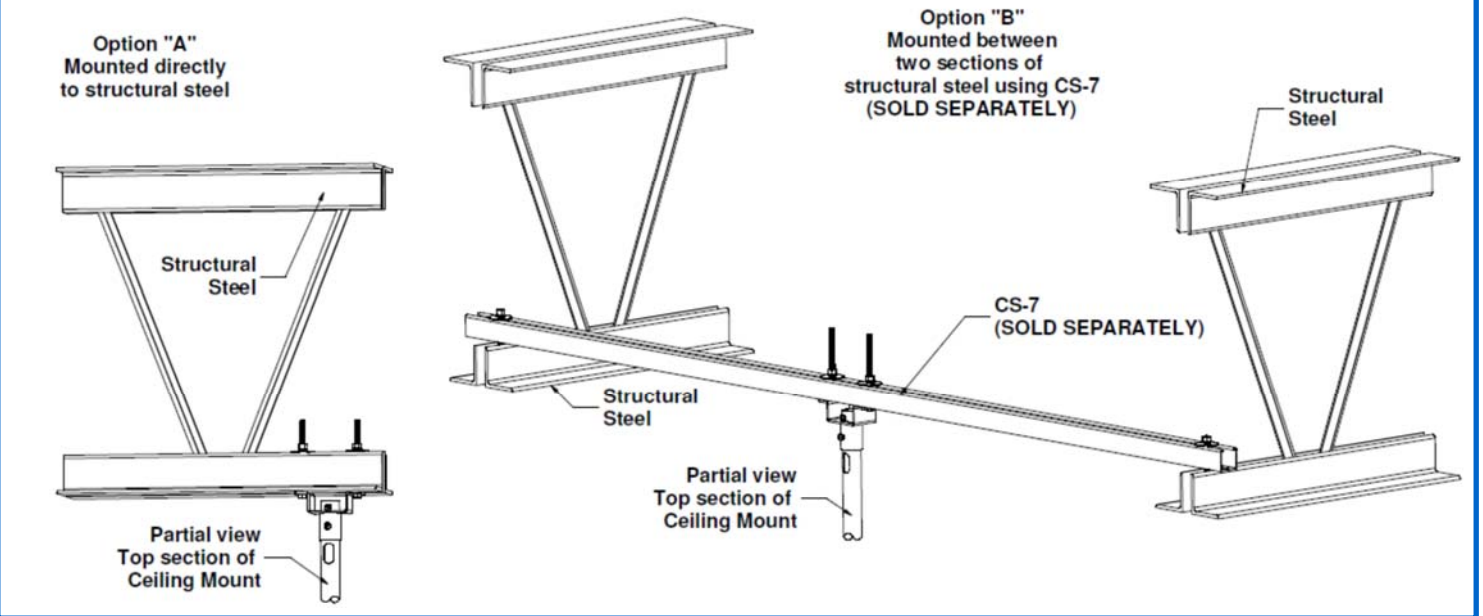

H - Hardware Kit #2

STEP 2 - Route power cables to desired location.

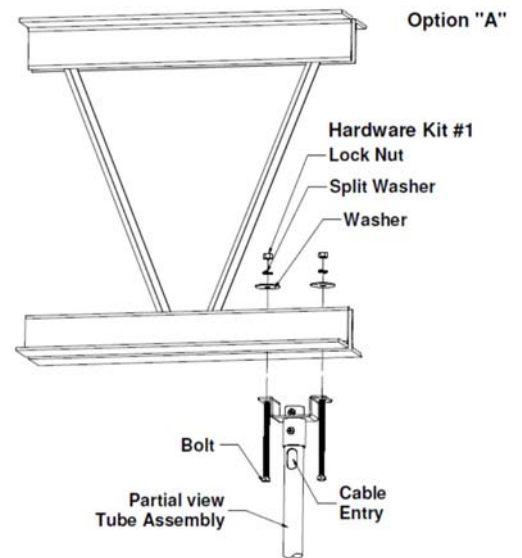

STEP 3 - Choose Mounting option A or B

STEP 4 - Install Top Assembly with Top tube

- Choose mounting Option "A" or "B".
- Slide part "A" over part "B" to expose thru hole at end of tube "B". See Fig. I.
- Insert screw "e" thru tube "B" and thread nut "g" on screw.
- Tighten screw "f" to lock rotation of tube in place.
- Mount Top Assembly with Top tube per chosen option using **Hardware Kit #1**.
- Route Tether and cables through Cable Entry in Top Tube.

NOTE: A minimum of 8 foot of power cable should extend beyond the bottom end of Top Tube.

STEP 5 – Install Extension Tube

- A. Route extended Tether and cables through Extension Tube “C” starting with the larger diameter end.
- B. Complete connection by inserting Screw “i” through Extension Tube and Top tube. Thread Lock nut “f” on Screw “i”.
- C. Pull cables to extend beyond the end of the Extension Tube. Make sure there is enough cable to thread through part “D” Middle Tube.
- D. When installing “D” Middle Tube, thread Tether and Cables starting with the end of the tube that has the slot. Slide part “D” into bottom of part “C”. Align the second thru holes of part “D” with bottom thru hole of part “C”. Insert screw “e” and thread on nut “f”.
- E. Tighten 3 wedging screws part “g” to prevent wobble and position Middle Tube “D” vertical. See detail below.
- F. Pull Tether and Cables to extend approximately 8’ beyond the end of tube “D”.

STEP 6 – Install Bottom Adjustment Tube and set height adjustment

- A. Route extended portion of Tether and cables through “E” (Telescoping Adjustment Tube).
- B. Slide Telescoping Tube into Tube “D” until bolt holes align at desired height.
- C. In Hardware Kit #2 find one Screw, 1/4-20 x 1.75” Pan Head part “h”. Use part “f” to lock the desired height. Slide screw through aligned adjustment holes of Telescoping Tube and install locknut part “g”.
- D. Retract extend Tether and cables as needed to have 6” inches of cable extending beyond telescoping tube.
- E. Tighten one wedging screw “g” to secure Telescoping tube.
- F. Secure Tether at the top to the structural steel by wrapping around and using cable clip included in Tether package.

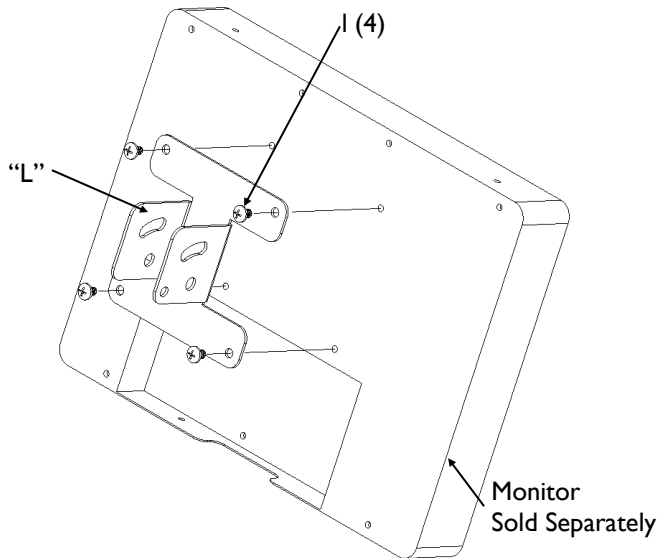

Proceed to Step 6 for CM-SI0-27-W
Proceed to Step 9 for CM-BBI0-27-W

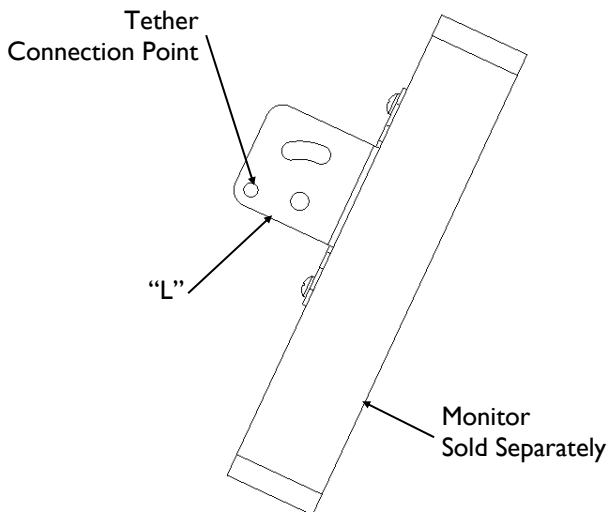

STEP 7 — Install 10" ePVM on Monitor Mounting Bracket

A. Prepare Monitors for installation.

- Remove monitor access door. Set aside to be installed later.
- Hardware Kit #3 has 2 packages of "l" monitor mounting screws. Use one package to mount monitor to item "L".

MOUNTING MONITOR

SIDE VIEW IDENTIFICATION

STEP 8 — Mount Monitor Mounting Bracket to Telescoping Ceiling Mount

A. Attach Tether to Monitor Mounting Bracket

- Use screw and nut found in Tether Package to attach Tether end with eye to Monitor Mounting Bracket at Tether attachment point identified below.

B. Align Monitor Mounting Bracket holes with holes in Telescoping tube.

C. Use the remaining 2 Screws and Lock nuts from Hardware Kit #3 to secure Monitor Mounting Bracket on Telescoping tube.

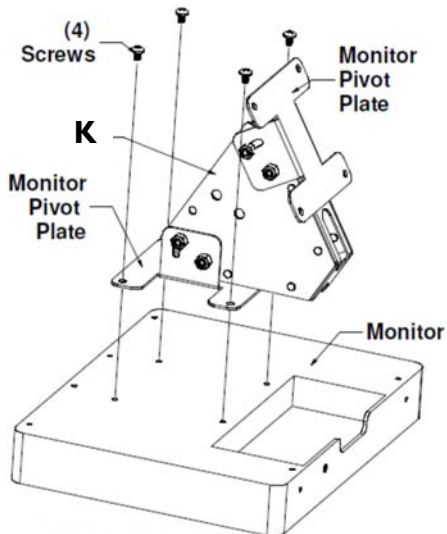

INSTALLATION INSTRUCTIONS

STEP 9 — Install 10" ePVM on Back to Back mount assembly

A. Prepare Monitors for installation.

- Remove monitor access doors from each monitor. Set aside to be installed later.
- Hardware Kit #3 has 2 packages of monitor mounting screws. Use one package to mount each monitor to item "K".

MOUNTING FIRST MONITOR

MOUNTING SECOND MONITOR

SIDE VIEW IDENTIFICATION

STEP 10 — Mount Back to Back assembly to Telescoping Ceiling Mount

A. Attach Tether to Back to Back Assembly

- Use screw and nut found in Tether Package to attach Tether end with eye to Back to Back Assembly at either Tether attachment point identified below.

B. Route Ethernet cables through Back to Back Mount assembly.

C. Align Back to Back Assembly holes with holes in Telescoping tube.

D. Use the remaining 2 Screws and Lock nuts from Hardware Kit #3 to secure Back to Back Assembly on Telescoping tube.

INSTALLATION INSTRUCTIONS

STEP 11 — Complete Ethernet connections to ePVM

A. Connect Ethernet cable to ePVM.

- Loosen screw allowing monitor mounting bracket to pivot.
- Connect each Ethernet cable to the adjacent monitor.
- Install access door removed in STEP 7 on each monitor.
- Retract excess Ethernet cable.
- Position Monitors to desired camera viewing angle.
- Snuggly tighten Pivot Screw and nut to secure Monitor position.
